

JFrame

```
graph BT; LoginWindow[com.mycompany.client.gui.LoginWindow] --|> JFrame[JFrame];
```

A UML class diagram illustrating inheritance. At the top is a box labeled 'JFrame'. Below it is a box labeled 'com.mycompany.client.gui.LoginWindow'. A blue arrow points from the 'LoginWindow' box up to the 'JFrame' box, indicating that 'LoginWindow' inherits from 'JFrame'.

com.mycompany.client.gui.
LoginWindow
